Fisher-Price iXL 6-in-1 Learning System

Fisher-Price iXL 6-in-1 Learning System

The [fisher price](#) ixl learning system is a compact handheld Fisher-Price iXL 6-in-1 Learning System designed with children in mind, the system is available in blue, pink and silver although the silver is a little more expensive for some reason, constructed of durable plastic so it is able to take the knocks that children can sometimes inflict on their toys,

When first starting out the help of an adult will be needed as there are batteries to insert and the initial set up to complete, the set up will require minimal calibration of the screen then enter the CD Rom that is included to set up the system for any future updates to the software and any customization that you may want to do, after that the Fisher-Price iXL 6-in-1 Learning System is ready for use

whats in the box

you will get the learning system itself which opens like a book and is designed so that it's easy to handle for children, a USB cable and the CD Rom,

The learning system comes with one animated story included but as with all of these types of systems the rest of the games are sold as extras which can mount up but the unit still provides hours of fun,

The *iXL Learning System* will keep curious kids busy, entertained, and learning with its six preloaded activities. Your child will practice reading and comprehension with the Digital Reader, which includes an interactive 15-page story available in either the reading or interacting mode. For kids who love action, the Game Player features a three-level arcade game that promotes counting and learning about sequences and numbers.

Future young writers can practice the alphabet and their penmanship in the Notepad mode, while young artists will flex their creativity with the Art Studio's digital tools. The iXL includes an MP3 Player with five preloaded kid's songs and a Photo Viewer with three sample images that can be embellished and manipulated.

The **Fisher-Price iXL 6-in-1 Learning System** is extremely intuitive and uncomplicated. The stylus has a holster and is tethered to the device by a sturdy nylon string, so your child will never lose it. Opposite the screen is a speaker with volume control, an Action button that allows you to make choices in certain modes, and a Home button that returns you to the Main Menu whenever you wish. Although this system is not totally new to the market it is expected to be one of the [best christmas toys this year](#) and is expected to sell fast

Here is a video from YouTube so that you can see some of the features and usability of the system

There are quite a few aftermarket games that you can buy for this system and although this is an extra cost the unit itself should provide hours of fun and learning for children, the list price on Amazon is \$82.99 and is currently (at time of writing this article) offered with a 40% discount at \$49.99 with free super saver shipping,
