wait no more star wars fans the best ever replica star wars lightsaber is here (ok you can guess I am a star wars fan), this model has by far the best light and sound effects in a mass produced version, there are no less than 4 motion sensor controls for the sound effects, power up, a hum when idle, clash when struck and a power down,

This version is also the official replica of luke skywalker's lightsaber from the incredible return of the jedi film, at the moment there are only 10 reviews of this model that I could find as it is fairly new but all of the reviews so far give it a ten out of ten, as for price the list price for this model is a whopping \$99.99 but it is advertised on amazon for \$69.99 which is a saving of 30%, this lightsaber is part of the [most wanted toy list for this christmas](#) and the tv will be advertising this hard so you can expect there to be a shortage if any at all on the shelves by mid December,
