Vtech - Kidizoom Spin & Smile Digital Camera

The latest version of the popular Kidi Zoom camera has been released for 2011, at first glance the camera looks much the same as the previous model so if your children already have one it might not be worth the money just to upgrade to new features,

But as technology improves so do the features so if you liked the last one then the latest model is much improved, here are some of the features,

The possibilities are countless together with the [vtech](#) The Kidizoom Twist Camera. Giving 4 big functions-- photography, picture editing, moving producing and gaming-- this toy will allow your kid's creativity to get flight. They will grow to be the loved ones photographer as well as take a image of themselves by using the innovative rotating lens. Your child may also make digital motion pictures using the contact of the button or play five cool game titles appropriate to the digital camera. For added usability, the Kidizoom Twist connects to a television so your son or daughter can watch her work or play video games within the huge display. Computer and Mac compatibility lets you hook up the digicam for your computer system for storing and sending shots. Actual 20 megapixel digicam with 4x electronic zoom, self-timer and five included video games. Rotating lens enables you to consider self portraits or take photos with amusing stamps, borders and foolish results. 256 MB inner memory and SD card slot for memory expansion. Video recording with sound. Laptop and Mac appropriate in mass storage mode--connect in your computer to store and send out pics.
